Interest in Vietnam leads to special venture

For Paul Falcone, BS'83, MBA'92, UNH audio/visual coordinator, growing up while the Vietnam war was at its height created an insatiable desire to learn more about that oriental country and its people. Ultimately, Falcone's interest in Vietnam led to a special venture which took him to the Far East earlier this year.

"Seeing news stories covering the war and feature stories about the people and their culture was almost a daily occurrence. I became almost fascinated with the country because it was so completely out of our culture," he says.

While an undergraduate in the UNH communication program, Falcone made friends with several Vietnamese families — friendships he kept after graduation. As he got to know the Vietnamese better and hear of their culture, he knew he had to travel to that ancient country and see it for himself. "So in 1992," he says, "I went on vacation to Vietnam. In the two weeks I was there, I visited Ho Chi Minh City and took a trip through the Mekong Delta. While flying home, I thought, 'There must be some project I can undertake that will allow me to return to Vietnam.'"

On his return to West Haven, he learned that a Vietnamese friend had been offered a marketing job in Ho Chi Minh City by the large multinational corporation, Pargrine, based in Hong Kong. With Vietnam making the shift from a centralized economy to an open market economy, and the international business community trying to establish a foothold, Falcone thought the time was right to produce a documentary on the process of establishing a business

in the country. And who better to produce the videotape than Falcone himself — with a bachelor's degree in communication, a few years experience producing corporate videotapes in New York City, and a master's degree in business administration.

"After being granted a five-month leave of absence from UNH and receiving a one-month journalist's visa from Vietnam," he says, "I outlined the major concerns to businesses considering investing in Vietnam and

the issues and problems facing the Vietnamese government in making the transition from controlled to

A street vendor in Ho Chi Minh City.

New department modernizing UNH computing capabilities

The old Computer Center at UNH has gone the way of the horse and buggy. In its place is the Department of Information Services, whose scope of work and responsibility far exceeds that of simple computer servicing.

"Most major colleges, universities, and businesses today have information services departments that plan and help direct information growth, provide education for users, and service equipment needs of various offices," says Dr. William Adams, BS'68, MS'85, who was appointed UNH chief information officer last spring. (See Summer 1994 *Insight*.)

"Only by creating a technology plan, and getting the cooperation

of the entire university community in implementing it, will we be able to successfully reach our goal of providing some of the finest information services available in higher education today," he maintains. "I am happy to say we have gotten great support from the academic deans, faculty, and administrators."

To launch the new Department of Information Services, Adams organized the new office into three operating groups and appointed a network administrator. The new department consists of:

- A technical support group to install, support, and maintain all

New faculty joins UNH family

The university welcomed a number of new faculty and staff members this fall. They are:

School of Arts & Sciences

Susan P. Kane has been appointed assistant professor of dental hygiene, Department of Biology and Environmental Science. She had been an instructor of dental hygiene, Fones School of Dental Hygiene, University of Bridgeport. She has a B.S. from the University of Connecticut and an M.S. in dental public health from Boston University.

Nancy A. Kuhl has been appointed administrative assistant of the dental hygiene program, Department of Biology and Environmental Science. She had been administrative secretary, Fones School of Dental Hygiene, University of Bridgeport. She has an A.A. from the University of Bridgeport.

Rosemary E. Macionus has been appointed director of operations/science coordinator, Department of Education. She had been manager of education programs at the South Central Connecticut Regional Water Authority. She has both a B.A. in biology and an M.S. in secondary science education from the University of Bridgeport.

Paulette L. Pepin has been appointed assistant professor of education, Department of Education. She had been assistant professor of history at Central Connecticut State University. She has a B.A. in history from Western Connecticut State University and an M.A. in history from Fordham University.

School of Business

W. Vincent Burke has been appointed general manager, WNHU, and instructor, Department of Communication. He had been station manager of television station WWLP in Springfield, MA. He has a B.S. and an M.Ed. from

Springfield College and is a Ph.D. candidate at Syracuse University.

Laurel Goulet has been appointed assistant professor of management, Department of Management. She had been an instructor at both the University of Connecticut and Clark University. She has a B.A. in psychology from Rhode Island College, an M.B.A. from the University of Rhode Island, and a Ph.D. in organizational behavior from the University of Connecticut.

Joseph A. Machnik has been appointed associate professor of management, Department of Management. He had been Practitioner-in-Residence for the UNH Department of Management, and is also UNH varsity women's soccer coach. He has a B.S. in physical education, an M.S. in guidance and counseling from Long Island University, and a Ph.D. in leisure studies from the University of Utah.

Omid Nodoushani has been appointed associate professor of management, Department of Management. He had been assistant professor of management at the University of Tennessee at Chattanooga. He received a B.A. in political science from the National University of Iran, an M.A. in international business from the University of Pennsylvania, and a Ph.D. in strategic management from the Wharton School of the University of Pennsylvania.

George M. Pushner has been appointed assistant professor of finance, Department of Economics/Finance. He had been a financial analyst at AT&T Communications. He has an A.B. and an M.P.A. from the Woodrow Wilson School, Princeton University, and a Ph.D. from Columbia University.

School of Hotel, Restaurant & Tourism Administration

Marilyn Lender has been appointed an instructor of tourism &

travel administration, Department of Tourism & Travel Administration. She had been the owner of a travel agency in Orange. She has a B.A. in French from Western Reserve University and an M.S. in French from Case Western Reserve University.

Rob Quigley has been appointed assistant professor, hotel/restaurant management. He had been senior vice president of Optimal Fitness Systems International. He has a B.S. in food service and hotel administration from Penn State University and an M.S. in nutrition and foods from San Diego State University.

School of Public Safety & Professional Studies

Howard J. Cohen has been appointed associate professor, occupational safety & health, Department of Occupational Safety & Health. He had been manager of industrial hygiene services for the Olin Corporation. He has a B.A. in biology from Boston University, a master of public health degree from the University of Michigan, and a Ph.D. in industrial health from the University of Michigan.

Vietnam...Continued from page 1

open economy. These included the condition of the country's infrastructure; its legal system; the bureaucratic procedures for getting licenses and permissions; and finally cultural considerations, such as what you should and shouldn't do when dealing with the Vietnamese," he explains. "This outline, prepared in part from research conducted prior to leaving, enabled me to interview the right people, ask the right questions, and gain access to places of concern and interest."

In late March of this year, Falcone flew to Hanoi, checked in with the foreign affairs office, and began scheduling interviews with government officials. "I knew it would be difficult, if not impossible, to get interviews with the people at the top, such as the ministers. So I set up my meetings with directors and deputy ministers. Incredibly I wasn't denied a single interview," he states.

He talked to officials at many departments, including the Ministry of Justice, the State Committee for Cooperation and Investment, the State Planning Committee, and the Labor Boards (to determine the types of skilled workers living in the country).

He taped the interviews in both Hanoi and Ho Chi Minh City within the one month timeframe allowed by his journalist visa. Then, with just his tourist visa (which was good for three more months but would not allow him to interview officials) in hand, he spent time videotaping what life was like in the countryside. "This is a very important aspect of the production because Vietnam offers huge tax incentives for business ventures located outside the two major cities," he explains.

All told, Falcone shot 30 hours of videotape. He must now write a script and have the interviews translated before he can edit the tapes to under an hour for syndication.

"If the finished product takes off, I plan to contact the networks to see if they'll fund a much larger production on the same, or similar, subject," Falcone says.

Transporting supplies on the Perfume River in Hue.

In addition, he undertook several side ventures while in Vietnam.

First he spent several days in Hue — the sister city of New Haven and the ancient imperial capital of Vietnam. "President DeNardis wrote a letter of greeting which I delivered to the mayor. I did enough videotaping Hue to be able to put together a short story and present it to New Haven officials," he explains.

Second, he went to Vietnam's two tourist resorts — Nha Trang, a seaside town located on the South China Sea, and Da Lat, a mountain retreat built by the French and a favorite of the Vietnamese — so

that he can put together a videotape travelogue. "Da Lat is especially beautiful, and it's the most popular place in the country to vacation and honeymoon," Falcone says.

Finally, everywhere he shot videotape he also shot still photographs. He expects to put an exhibition together that can go on display in the next several months.

As a two-time visitor to Vietnam, what is Falcone's overall impression of the country? "Being a tourist there is still an adventure," he concludes. "But as the people of an emerging country, the Vietnamese can look forward to a great future."

New Haven junior and senior high school students who participated in the Connecticut Pre-Engineering Program (CPEP) at UNH last summer demonstrate some of their newly acquired knowledge of chemistry to Charles Terrell, back row left, president and CEO of New Haven Savings Bank, and David Rice, back row right, vice president and secretary of the bank. Students from left to right are Valerie Belanger and Love Dozier from the West Hills Middle School, Fernando Ayala from the High School in the Community, and Nyckol Tavares from the Cooperative High School. Far right is Ray Cocola from the Hartford Public School System, who served as a CPEP instructor at UNH. CPEP offers qualified New Haven youths an opportunity to get a taste of college life, do laboratory experiments and coursework adapted to their age level, and learn about careers in science, math, and engineering. New Haven Savings is a corporate sponsor of the CPEP program at UNH. Other contributing sponsors include Shawmut Bank, Aetna, the U.S. Department of Energy, CPEP, Inc., the New Haven Public Schools, and the university.

Overall enrollment shows gain over last year

Incoming new and transfer students totaled 582 this year. When added to the 1,031 returning students, the total day undergraduate population was 1,613—up approximately three percent from last year.

According to Steve Briggs, dean of admissions and financial aid, "This shows a major increase over recent years. For example, the incoming class just three years ago was 523." Briggs attributes new programs such as the "No Hassle" scholarships instituted last year and better packaging of financial aid as reasons for the increased enrollment. "There were 42 members of the incoming class who received No Hassle scholarships this year, including one student who was his high school valedictorian. This brings to 52 the number of students presently on campus who have been awarded these scholarships over the year and one-half life of the program."

Associate Provost Brenda Williams agrees that better packaging of financial aid is one cause of higher retention. "Our office, staffed by part-time counselors, contacts as many unregistered returning students, as well as those on leaves of absence, as possible. This year we were able to assist 88 percent of the eligible students in returning. Many were able to reregister simply because more financial aid was available to them." The economy has also made it advantageous to stay in school, says Williams. "The difference in lifetime earnings of a college graduate versus a high school graduate keeps growing, and students are well aware of these figures," she states.

Four of the incoming freshmen studied last semester at UNH under the Outstanding High School Seniors program. "That's almost a quarter of the 13 students who were enrolled in the program," says Linda Carlone, assistant director of admissions. "In addition, two students who were in the program in 1991 but chose to enter other colleges, this year transferred to UNH."

The average SAT scores of our

Two of the more than 350 new freshmen who moved into the residence halls on August 28 begin unpacking for the fall semester.

fully accepted incoming students—925 for males and 945 for females—are well above both the Connecticut and national averages.

Fire science, dental hygiene, and criminal justice are again the most sought-after programs for incoming freshmen and transfers this

year. Also, according to Briggs, "Connecticut continues to be the number one recruiting market followed by New York. The new growth geodemographic markets are New Jersey and Massachusetts."

The incoming students represent 22 states and 20 foreign countries.

UNH awarded graduate fellowships to 34 students for the 1994-1995 year. Two additional fellowships were awarded to UNH students by the American Industrial Hygiene Foundation. Recipients for fall 1994 are, left to right, row 1—with President Lawrence J. DeNardis—Jan Geist, Mary-Jane Chase, Pamela Madonia, Lucy Stronkowsky, Juliana Ghanem, Victoria Cathcart (Industrial Hygiene), Rochelle Lauer, M. Susan Wilson, and Marlane Cox (Industrial Hygiene). Row 2, Ashlee Armata, John Palumbo, Paul Sweet, Craig Fuchs, Nick Sostilio, JoAnne Warren, John Hammond, James D'Errico, and William Gere, dean of the Graduate School. Row 3, Provost James Uebelacker, William Ryan, Edward Anthony, Steven Zalesch, Eryk Wenzia, Edward Hemstreet, and Pankaj Khosla. Missing from the photo are Scott Allen, Michael Beke, Pamela Burns, Gustave Carlson, Allen Coppola, Barbara Gigliotti, Lisa LeMontangue, Joseph Mammone, Paul Prestegard, Charlene Rohloff, John Joseph Scott, Heather Sjostrom, and Monica Stein.

HRTA implements new curricula

After more than a year of intensive discussions with business leaders, alumni, and students, the School of Hotel, Restaurant & Tourism Administration (HRTA) has implemented entirely new undergraduate curricula designed specifically to meet the needs of the hospitality, tourism, and dietetics industries.

"Our approach," says Lalia C. Rach, HRTA dean, "was three-pronged:

1. To revitalize the curriculum;
2. To secure a solid knowledge base; and
3. To balance the technical knowledge needed by students with conceptual and people knowledge.

"We needed to reflect the realities of the service-based industries. Higher education must take a more proactive role and, in fact, be a catalyst for change within our industries. We are one of the few dietetics, hospitality and tourism schools in the country that is applying the concept of re-engineering to its curriculum and faculty."

In addition to the UNH core curriculum that all undergraduates must take to ensure they have a well-rounded education, HRTA students must also take a school core curriculum. "The idea of an HRTA core is a new concept and we believe it will result in more management-oriented graduates," says Dean Rach.

The HRTA core consists of five courses: Marketing, Human Resources Management Theory, Human Resources Management Application, Leadership Theory, and Leadership Application. "In the past, students were prepared for their first job within the hospitality and tourism industry but not for a career," says Rach. "This new core — especially the application courses that teach the student to put theory into practice — should help them evaluate risks and readily step into management roles."

Students majoring in hotel and restaurant management and tourism and travel administration must take an applied research course, in addition to the core courses.

"When they enter industry, our graduates will be able to survey the marketplace, evaluate focus groups, and analyze data to make informed management decisions," according to Dean Rach.

"We have also reshaped all the undergraduate courses within each of the three HRTA departments — dietetics, hotel and restaurant management, and tourism and travel administration," she says.

Rach notes that computer technology is now an everyday part of the HRTA curricula. Already under construction at the school is a computer laboratory that will house 18 computers. In addition, HRTA has received a \$20,000 software grant for CompNutrition, a California company, which dietetics majors

can use to analyze nutritional content and hotel and restaurant management students can use to devise nutritionally positive menus.

Under the new curricula, students can get a degree in any of the three departmental areas of HRTA, and have specializations. "Students can have two specializations, and one must be in their major. However, they can also take another specialization in another area of HRTA — or in any other UNH school," Rach states.

"We are confident that when students complete our new curricula, they will enter the work place with a knowledge of risk taking and an ability to provide the leadership the hospitality industry needs to be successful in the 21st century," she concludes.

University Tax Seminars, Fall 1994

Listen to the tax professionals talk about Individual Income Tax, Corporate Tax, and Estate Planning at:

Yankee Motor Inn East Lyme	Nov. 10	6:30-8:30 p.m.
University of New Haven Student Center Lounge	Nov. 12	9 a.m.-12 p.m.

For more information, call Bill DeMayo, Planned Giving Officer, (203) 932-7130.

E. G. Watkins, center, president of Simplex Time Recorder Co., presented a \$25,000 check to President Lawrence J. DeNardis, second from left, in October. The funds will be used to build a new fire science laboratory. Looking on during the presentation are Ronald Kirby, left, director, building systems marketing for Simplex; Provost James W. Uebelacker, second from right; and Thomas Johnson, dean of the School of Public Safety and Professional Studies.

Campus improvements, re-engineering Among Strategic Plan initiatives

Major steps have been taken since May by President Lawrence J. DeNardis to implement the recommendations of the Strategic Issues Committee. The most visible of these has been a major initiative this summer to "green and clean" the UNH campus.

Construction of the "Alumni and Friends Walkway to Success" — an impressive brick and concrete sidewalk connecting the Admissions Building to the Student Center — is essentially complete. Many alumni, faculty, staff, and friends have part ownership in the walkway as they purchased one or more of the bricks in the sidewalk. The approximately 300-foot pathway contains more than 2,500 red bricks.

Major changes were made to the main Maxcy Hall parking lot, giving it a sleeker look to complement the new walkway and further beautify the campus. The small parking area at the side of Maxcy was made into a separate lot with its own entrance. The entrance to the main lot was moved closer to Maxcy Hall, and several islands with shrubs, trees, and signs have been erected.

Another major greening project gets underway this fall — creation of several recreation and athletic fields in a 3.5-acre area between the residence halls and the football offices. When completed, the area will include a half-size practice/athletic field, a full-size practice/athletic field, outdoor basketball courts, a sand volleyball court, and a general recreation area where students can play catch, throw frisbees, or engage in a variety of other outdoor activities.

In the quadrangle near the Peterson Library, *Night Gesture I*, a sculpture by the late Louise Nevelson, was placed on a specially prepared platform. The contemporary sculpture, on loan to the university until January 1, 1998, arrived on campus in mid-August. The Nevelson sculpture joins two others already on display at UNH: *Bohunha* by Alexander Hunenko, which stands outside the

campus bookstore, and *Skateboarder I*, by S. Seward Johnson, Jr., currently located near the entrance to the library.

In addition to these changes, the university has retained the firm of Einhorn Yaffee Prescott (EYP), Architecture & Engineering, P.C., of Albany, NY, to create a master facilities and grounds plan for the campus.

DeNardis also announced in June that Introspect, Inc. of Trumbull, an outside consultant with a history of helping clients gain rapid insights into operational inefficiencies and a team approach to finding remedies, had been hired to help the university review every administrative process it performs. DeNardis named six faculty and administrators to be co-consultants and work with the Introspect team in making recommendations that will help the university through the process of re-engineering its administrative activities.

The six UNH co-consultants are: Bill Adams, chief information officer; Debbie Chin, athletic director; Ruthe Davis, director of special projects; Bob Gaensslen, professor of criminal justice and the first dean of the School of Public Safety and Professional Studies; Ira Kleinfeld, assistant provost for external affairs; and Marj Montague, controller.

At the first meeting, DeNardis set three major goals for the team. They are:

- Movement toward an open, results-oriented culture;
- Introduction of new technologies which will enable us to work more efficiently and effectively; and
- Alteration of our work flow which will enable us to better serve our "customers."

The major results expected from the re-engineering include:

- A focus on quality service that will satisfy users' needs;
- A minimization of narrow specializations and the creation of cross-functional work teams;

Night Gesture I

- Removal of barriers of control that inhibit smooth and efficient processes;
- Reduction of shadow systems and multiple records, which will enable us to simplify processing and eliminate unnecessary clerical work;
- Creation of a new management style and culture that—
 - Specifies job performance expectations;
 - Builds in accountability;
 - Creates the expectation that work will be done on time and within budget;
 - Incorporates job training for personnel; and
 - Eliminates, reduces, and modifies policies that cause inefficiencies.

The UNH and Introspect teams have been busy gathering data all summer. Early attention has been given to two specific areas:

- Developing an integrated scheduling system that will allow students to plan course schedules over multiple semesters and reduce instructional costs; and
- Re-engineering our recruitment, admissions, and registration processes to better serve students.

It is expected that a full report of the activities of the teams will be made to the officers and Board of Governors by late October.

Second annual UNH-West Haven Community Day a great success

The UNH campus came alive with fun-filled activities for all ages on Saturday, September 17, during the second annual UNH-West Haven Community Day. More than 500 West Haven residents visited the UNH campus to listen to music, watch demonstrations, and participate in a variety of activities. The day was capped off by the UNH Chargers vs. Indiana University of Pennsylvania football game, in which the Chargers were victorious.

Some West Haven school children learn how to cheerlead with members of the UNH Charger cheerleading squad.

"I drew this picture" a West Haven resident proclaims as she proudly points to a picture she drew at UNH-West Haven Community Day activities.

Preparations for the event began months ago and included the Joining of Hands poster contest, which was open to West Haven grade school students. This year's winning poster was designed by Linda Giano, a fourth-grade student at Alma E. Pagels School. The poster was reproduced in bright yellow and blue, and was used to promote community day both on campus and throughout West Haven.

Activities included music, face painting and story hours for children, an art show of works created on the spot, sports clinics, and demonstrations of everything from robotics to fire technology. In addition, Rally the Raven (mascot of the New Haven Ravens) was on hand; there was an art exhibit by Very Special Artists of Connecticut; and an inflatable planetarium provided by the West Haven School system allowed spectators to view the nighttime sky.

One of the more popular places around noontime was the foodline, where West Haven visitors could get a hot dog and a soda for \$1.00.

At left, Rally the Raven, mascot of the New Haven Ravens, makes friends with two West Haven school children during Community Day.

A ROUND CAMPUS

This information was written by the staff of the Public Relations Department.

School of Arts & Sciences

Ramesh Sharma, assistant professor, mathematics, reviewed an article in *Archivum Mathematicum* (BRNO) for the publication *Mathematical Reviews*. He also had a paper "Ricci Curvature Inheriting Symmetries of Semi-Riemannian Manifolds," jointly written with K. L. Duggal, professor of mathematics at the University of Windsor, Canada, published in *Contemporary Mathematics*, a publication of the American Mathematical Society.

Robert Dugan, professor/coordinator I/O graduate psychology, has reviewed five books with T. M. Elibero (MA '93) for *Personal Psychology: Managing Conflict in Organizations; Job Relocations: Managing People on the Move; Behavior Mismatch: How to Manage Problem Employees Whose Actions Don't Match Your Expectations; Breaking the Chains: The Empowerment of Employees: How to Evaluate, Monitor, and Improve Employee Empowerment Levels; and Working Together: The New Rules and Realities for Managing Men and Women at Work*.

Robert Glen, professor, history, has published "The Fate of John Wesley in the English Satiric Prints," in *Methodism in Its Cultural Milieu*, ed. Tim Macquiban (Oxford, 1994). He has also written two reviews: "The Unpublished Poetry of Charles Wesley," vols II-III, in *The Eighteenth Century: A Current Bibliography*; and Michael J. Childs' "Labours' Apprentices: Working-Class Lads in late Victorian and Edwardian England" in *American Historical Review*.

Bruce French, professor, English, will be presenting a paper in November on the subversion of narrative in Dostoevsky's fiction at the annual conference of the South Atlantic Modern Language Associa-

tion in Baltimore, MD. He also sang this past summer in the chorus of Rossini's comic opera *The Barber of Seville*, a production of the Opera Theater of Connecticut.

Judith Gordon, associate professor, sociology, is an International Social Science Council representative on the Non-Governmental Organization Committee on the status of women at the United Nations. She is the chair of the Working Group on Education and Research of that committee. On September 8, she served as a facilitator and resource person of the breakout group on Health, Prevention, and Treatment at the Regional Preparatory Workshop of the Women's Bureau of the United States Department of Labor and Department of State. In August, Gordon organized a session in Los Angeles on Older Women Social Scientists, jointly sponsored by the Committee on the Status of Women of the Eastern Sociological Society; the Society for the Study of Social Problems; the American Sociological Association; and Sociologists for Women in Society, in cooperation with other sponsoring groups. She is also a member of the Ryan White Planning Council of New Haven and Fairfield County, and co-chair of the working group on the Elderly and HIV/AIDS of the Northeastern Gerontological Society and serves on its executive board.

Jeffrey Greene, associate professor, English, has work appearing in *The New Virginia Review*, and two poems from his book *To the Left of the Worshiper* have been put to music and will be performed in New Haven and New York as a part of "Mirror Visions: Poetry in Music." In addition, in conjunction with other professional educators and UNH student interns, Greene is reviving Phoenix: The New Haven Reading Series. During the past 15 years, Phoenix has sponsored read-

ings by nationally and internationally known poets and fiction writers.

Michael Morris, professor, psychology, contributed a chapter, "The Role of Single Evaluation Courses in Evaluation Training," to the summer issue of *New Directions for Program Evaluation*.

School of Business

Jerry Allen, professor and chair, communication/marketing, has been named acting dean of the School of Business. He presented a paper, "Communication Avoidance and Academic Achievement" to the Instructional and Developmental Communication Division at the International Communication Association convention in Sydney, Australia, in July. He also presented a paper co-authored with Martha Woodruff, associate professor, economics, and Ben Judd, professor and acting chair, communication/marketing, entitled "Participation in Decision Making and Job Satisfaction: Differences in Female and Male Faculty" at the Sydney meeting. He has been selected as a paper referee to select papers for the association's 1995 convention.

Allen also presented "Communication—The Heart of TQM" at the annual spring luncheon of the Valley Chamber of Commerce in Derby. In addition, he has been elected to serve on the board of directors of the Alliance Theatre, UNH's resident theater company.

Neal Gersony, assistant professor, management, spoke on "Pricing in the Biotechnology Industry" at the Pricing Conference of the Institute of International Research in Chicago last spring. He received his doctorate from Rensselaer Polytechnic Institute in May.

Steven D. Goldberg, assistant professor, management, attended the National Association for Family Business Center Directors Conference in Portsmouth, NH, in July. In August, he attended the Conference for New Avenues in Risk and Crisis Management in Las Vegas, where he presented a paper with Beverly Harzog of the University of Georgia entitled "The Impact of Crisis Management Techniques on

Stock Value and Financial Performance." His paper "Significant Points Leading to Successful Succession in Family-Owned Businesses" has been accepted for presentation at the Family Firm Institute Conference in October in Scottsdale, AZ.

Donald C. Smith, associate professor, communication, recently had two articles accepted for publication, "Look Who's Listening: The Importance of Sub-Audiences in Public Speaking" will appear in *The Speech Communication Teacher*; and "Test Your Freshman I.Q." will appear in *The Freshman Year Experience Newsletter*.

Richard Tino, adjunct faculty, communication/marketing, recently reviewed Paul Rand's new book *Design, Form and Chaos in Communication Quarterly*. He also had four biographies published in the *Dictionary of American Biography*. In addition, he has had a poem published in *Connecticut River Review*.

School of Engineering

David J. Wall, professor and chair, civil engineering, has been elected to the grade of "Fellow" in the American Society of Civil Engineers.

UNH's Institute of Analytical and Environmental Chemistry, directed by **George L. Wheeler**, Jacob Buckman Professor of Chemistry and Chemical Engineering, received three gifts this year. A new Atomic Absorption Spectrometer valued at \$20,000 was donated by Perkin Elmer Corporation of Norwalk. A two-year research grant of \$149,000 was received from the Connecticut Department of Environmental Protection to study the effects that the dredging of contaminated sediments have on early life stages of certain fish. A \$10,000 project to compare PCB and PAH contamination in New Haven Harbor Blackfish with those of a less contaminated Long Island Sound site was funded by the New Haven Foundation. Both research projects are being conducted in collaboration with the U.S. Marine Fisheries Service Laboratory in Milford. These projects will support two full-time graduate stu-

dents and provide summer employment for two undergraduates.

Alex Sommers, professor, industrial engineering, received the Admiral Henry Eccles Medal from the Society of Logistics Engineers at their annual national meeting in Anaheim, CA, in August. The award recognized Sommers for introducing formal degree programs in logistics to New England. Sommers also presented a paper, "Utilizing Logistics Concepts in the Marginal Manufacturer," at the meeting. He is state director for the society.

Gregory P. Broderick, associate professor, civil engineering, has been appointed by the National Research Council's Transportation Research Board to serve as a member of its Committee on Physiochemical Phenomena in Soils. His appointment term runs from 1994 to 1997.

Ismail I. Orabi, professor, mechanical engineering, presented a paper, "Dynamic Response of an Aerospace Payload under Various Loadings," at the 5th Nonlinear Vibrations, Stability, and Dynamics of Structures conference in June in Blacksburg, VA. He also presented a paper, "Performance Analysis of Base Isolation Systems for a Multi-Story Building," at the U.S. National Congress of Applied Mechanics in June in Seattle, WA.

School of Hotel, Restaurant & Tourism Administration

Betty van Dyke, travel and tourism consultant, was elected secretary of the Connecticut Tourism In-

dustry Committee. She also serves as chair of scholarship awards for the committee.

School of Public Safety & Professional Studies

William Norton, associate professor, criminal justice, recently completed an evaluation of drug treatment programs for the state of Connecticut. He has also had an article on the subject of economic factors and crime accepted for publication by the *Journal of Criminal Justice*.

David A. Maxwell, professor and chair, criminal justice, spoke on the "Trade Secret Law: Requirements and Ramifications for Security Managers" at an international gathering of members of the American Society of Industrial Security in Tucson, AZ, in May.

Southeastern Connecticut Branch

Martha M. Fox, associate director, was installed in August as the 21st president of the Waterford Rotary Club.

UNH Foundation

M. L. McLaughlin has been appointed president and chief executive officer of the University of New Haven Foundation by President Lawrence J. DeNardis. She had been dean of the School of Business for the previous 13 years.

President Lawrence J. DeNardis, center, received the Anti-Defamation League's Torch of Liberty Award in April. With him for the occasion were, from right, his son Mark; wife Mary Lou; son Gregg; and Gregg's guest, Cathy Boyle.

Computing...Continued from page 1

computing and networking hardware within the university;

- An administrative service group to support all VAX/Poise based administrative computing functions. Included in the responsibilities of this group is support of specific purpose software for departments to ensure accurate and on-time reports, and their evaluation and the development of new systems that will meet current and future computing needs;
- An academic services group to provide technical software support for all academic areas of the university; and
- A network administrator to oversee the resources of the campus network and its connection to Internet and all external information sources.

While organizing the new staff, Adams began gathering information on which to base a master plan. To do this, he has or will visit every school, academic department, and administrative office in the university. During the visits to date, he assessed the hardware and software already on hand and discussed the present and future technology needs of each area.

Next, he updated the Student Computer Lab in Echlin Hall with the latest equipment and software. "Some of the existing equipment was old and wouldn't run present-day software programs," Adams says. Now students can do almost anything at the Student Computer Lab — from E-Mailing a message to a friend at another college, to learning a new application, to doing some actual programming.

Adams and his staff also created a Faculty Lab in Echlin Hall where faculty can learn application programs. Both the faculty and student labs are open Monday through Saturday 9 a.m. to 11 p.m., and Sunday from 1 p.m. to 11 p.m.

"Given our resources, it is far more efficient at this time to centralize most computer lab operations in a single location — Echlin

The updated and newly remodeled computer lab in Echlin Hall is heavily used by students.

Hall. At some time in the future, we hope to have computer labs in every school in the university."

Adams and his staff also updated the computer teaching classroom, located in room 129 of Maxcy Hall. There, where students are taught word processing, data base, and spread sheet programs, he will install 24 state-of-the-art computers for students plus a single computer at the faculty station in the room. The student computers will be grouped in twos, and between each of the groupings will be a monitor that will show students what is on the teacher's monitor. "This way the students can see the correct way to

operate a particular program and duplicate that on their own computers," states Adams. "Placing monitors between each set of two student computers is far less expensive than buying two giant monitors — one for each side of the room. In addition, it is a good deal less expensive to repair an individual monitor than a giant monitor."

What's next on the information services agenda? "Once we have the master plan prioritized, we'll implement it as resources permit," says Adams. "Of course because computer technology is rapidly changing, our master plan — and our priorities — will constantly be changing as well."

Interactive video conference arranged by Southeastern branch

The UNH Southeastern branch co-sponsored a live interactive video conference on "Preventing Violence in the Workplace" on October 18 at Fitch Senior High School in Groton.

The Center for Work and Family and the Groton Public School system were also sponsors of the conference.

Because the video conference was interactive, participants were able to have their questions answered on the air by the program host Jerrold M. Post, M.D., an internationally recognized expert on leadership, crisis management,

and the psychology of violence and terrorism.

Other speakers on the program were Dr. Dennis Johnson, president of Behavioral Analysis and Consultants and an expert on workplace violence; Virginia Melvin, professional in corporate security and a specialist in violence against women and the protection of executives; Eric Shaw, Ph.D., an organizational psychologist and adjunct associate professor at George Washington University; and Eugene Rugala, the FBI's leading expert on violence in the workplace.

Dental hygiene clinic built this summer

A dental hygiene clinic that will enhance the opportunity for students enrolled in undergraduate dental hygiene programs to gain the practical experience required for professional licensure was built this summer at 419 Orange Avenue across from the main campus.

Two open houses — one on September 17 (coinciding with UNH-West Haven Community Day festivities) for the public and the other on October 5 for the dental community, board members and other dignitaries — were held to formally open the new facility.

"This clinic is an important part of our dental hygiene programs," said President Lawrence J. DeNardis. "It will ensure that our students will be able to do their practical work on campus and in a brand new facility with the latest equipment."

The new clinic includes 18 treatment areas where dental hygiene students will clean teeth, take dental x-rays, and provide fluoride treatments and oral hygiene instruction. Also housed at the clinic are a central steriliza-

Many West Haven residents toured the new Dental Hygiene Clinic facilities during UNH-West Haven Community Day.

tion area, three x-ray stations, a darkroom facility, and a separate private treatment room.

During the first stage of their practical training, the students will work on one another's teeth; then, as their training progresses, they will treat clients external to the program.

The external client population is expected to include members of

the UNH community, patients from Yale-New Haven Hospital and the Veterans' Administration Medical Center in West Haven, individuals referred by area dentists — especially children requiring preventive care — and persons who learn of the clinic through the university's community outreach efforts. Fees will be charged on a sliding scale.

Ronald Shaw of Pilot Pen named fall Bartels Fellow

Ronald G. Shaw, president and chief executive officer of Pilot Pen Corporation of America, will visit the campus on Thursday, November 10, as the fall 1994

Ronald G. Shaw

Distinguished Bartels Fellow.

A business leader who is also well-known for his role in the "Prejudice Hurts" public service advertising campaign and other efforts to promote tolerance, Shaw is a member of the board of directors of Pilot Pen's parent company, Pilot Corporation, the Japanese writing-instrument

manufacturer. He is one of only six Americans to have been elevated to this level in a publicly held Japanese firm.

As part of his day-long stay on the UNH campus, Shaw will deliver a fellowship address entitled "The Pilot Pen Story: A Successful Marketing Case History," at 11 a.m. in Dodds Hall Auditorium. The speech will be followed by a question-and-answer period. There is no admission fee.

In addition, Shaw will participate in meetings and classes with undergraduate students from the UNH School of Business and will attend an informal luncheon with students as well. A visit with business people enrolled in the university's Executive M.B.A. program will close out the day.

Commenting on the event, President Lawrence J. DeNardis

said: "Ron Shaw epitomizes the purpose of the Bartels Fellowship, which is to offer our students the opportunity to interact with outstanding achievers and entrepreneurs who have risen to the top echelons of their business or professions. He is a superb example of both a successful businessman and a concerned, involved citizen. I look forward to welcoming him to campus."

The Bartels Fellowship has been established at UNH to bring to campus, on a regular basis, persons of national stature and prominence in the fields of business and public service. The primary goal of the fellowship is to broaden the horizons of undergraduate students and enable them, in an open and informal atmosphere, to gain exposure to the ethics and dynamics of the aforementioned areas of endeavor.

Isabella Dodds continues tradition of helping UNH

The late Robert B. Dodds and his wife, Isabella, set up a Charitable Lead Trust for the benefit of UNH several years ago. Under the trust agreement, the earnings from the trust will be paid for 20 years to UNH.

"Most people don't realize that it doesn't take a massive amount of money to help the institution with a trust like this," says Isabella Dodds.

Why have the Dodds—and now Isabella alone—given so much of themselves to UNH?

"For two reasons," she explains. "First, the university has done an excellent job in providing quality education for its students. Bob and I always thought it was a nice way to recognize a good job.

"Second, both Bob and I had to work our way through college and knew that it was a tough road. So our special interest has been to help create financial assistance for students who really want an education."

The Dodds' association with UNH goes back to 1927 when Robert had a graduate teaching assistantship at Yale. During that time he also taught courses at the New Haven Junior College, predecessor of UNH, which used Yale buildings in which to hold classes. "Bob was impressed with how hard those students worked to get ahead," Mrs. Dodds explains.

"Years later," she says, "Bob became president and treasurer of Safety Electrical Equipment Corp. He always had a high opinion of the UNH engineers who worked there.

"After Bob became a member of the UNH Board of Governors in 1968," she reminisces, "he worked hard to establish the Fund for Engineering. In fact, he was honorary chairman of the fund. The fund raised more than \$2.5 million for construction, equipment, and the establishment of an endowment fund for the School of Engineering. Bob's special interest was in the dean's endowment, which supports faculty development and student scholarships."

Since her husband's death in 1990, Mrs. Dodds has continued to assist UNH. She has taken her late husband's place as a member of the Board of Governors. She is also a member of the recently established Legacy Society of the University of New Haven, which was established to recognize donors making deferred gifts. In addition, she is an active member of the Friends of the UNH Library. "I think the Friends do a great job of bringing programs and speakers to the university. These programs help complete the 'university experience'," she says.

Ethics forum focuses on engineering

"Ethical Issues for the Engineering Profession" will be the topic of the next Ethics in the Workplace symposium scheduled for November 16, beginning at 7 p.m. in Dodds Hall Auditorium. Admission to the symposium is free.

Among the panelists will be A. Pablo Iannone, professor of philosophy at Central Connecticut State University and author and editor of several books on ethics, technology, and business; Lois Roberts, a professional engineer in Westport, where she runs a consulting firm, and past president of Connecticut Engineers in Private Practice, Inc., whose ethics committee she currently chairs; and Richard F. Piotrowski, a professional engineer and deputy commissioner of the Connecticut Department of Public Works. An additional panelist will be named later. Commenting on the panelists' remarks will be M. Jerry Kenig, professor of mechanical engineering and dean of the School of Engineering; and Constance M. McLean, a quality assurance and reliability engineer and a student of industrial engineering at UNH. Joel Marks, professor of philosophy at UNH, will moderate.

The ethics series is the brainchild of Marks; Gordon Simerson, associate professor of industrial/organizational development; and Judith A. Neal, associate professor of management at UNH and a former consultant in organizational development and ethics for Honeywell. The three surveyed more than 1,000 academicians and business people regarding their perceptions of ethics in general and the teaching of ethics at the college level in particular. From the responses, they drew up a list of ethics-related topics for further exploration.

Since April 1990, the programs have drawn sizeable audiences and engendered overwhelmingly favorable responses.

Isabella Dodds, left, chats with Nancy Kyger, UNH director of development, in front of the building named for her late husband Robert B. Dodds.

Inaugural family business seminar a success

More than 55 people attended UNH's Center for Family Business inaugural seminar on Tuesday, September 27, at the New Haven Lawn Club.

The half-day seminar, entitled "Profiting from Family Values and Traditions," featured Nancy Upton, Ph.D., founder and director of the Institute for Family Business at Baylor University. Raised in a family business, Upton is co-author of *Entrepreneurship: Creativity and Growth*. Active in all aspects of family business education, she also teaches a family business management course and facilitates Baylor's

Family Business Retreat Program.

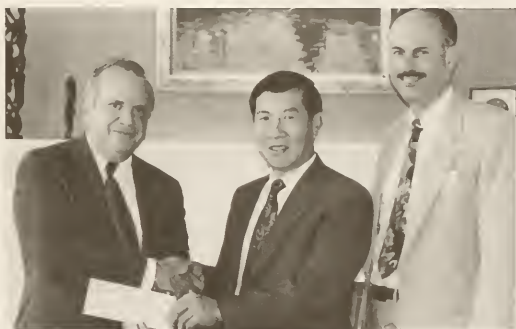

The UNH Center for Family Business was created to help strengthen family firms, which are the backbone of Connecticut's economy and an important hope for economic revival in the region. The center offers a full roster of seminars on emerging trends; confidential consultations with faculty and professionals; access to the latest CD-ROM and on-line business data bases; strategies for ownership and management succession; and the opportunity to tap into a rich, national system for invaluable experience and

knowhow. The center is also a means of bringing together individuals of similar backgrounds and experiences, creating an immediate business peer group and serving as a sounding board for ideas and solutions to common challenges.

"The center is meeting a need that has long gone unaddressed," said Michael Camerota, the organization's executive director. "Attendance at this inaugural seminar reflected interest in the program and in the mission of the center which is to help businesses prosper in this generation and survive to the next generation."

President Lawrence J. DeNardis, left, receives the thanks of Director General Wu Tung-ming, right, of the Investigation Bureau, Ministry of Justice, Republic of China, after delivering the keynote address at the Fifth Sino-American Criminal Justice Institute in Taipei in June. Looking on is Thomas Johnson, dean of the School of Public Safety and Professional Studies. UNH will be the host for the Sixth Sino-American Criminal Justice Institute next spring.

Dr. Henry C. Lee, center, forensic science Practitioner-in-Residence at UNH, has joined the O.J. Simpson defense team in the now-famous California murder trial as an expert on forensic science and, in particular, on DNA testing and matching. Lee plans to give half of his earnings from the Simpson case to the Endowed Scholarship Fund for Forensic Science. The fund is not fully endowed yet, but will eventually provide a scholarship for a forensic science student. Here, Lee gives UNH President Lawrence J. DeNardis, left, a check representing some of his first earnings from the case. Looking on is James W. Uebelacker, vice president for academic affairs and provost.

Make the gift that can Increase your income for life and make everyone the WISER!!

What a great way to Support the University of New Haven—through a Charitable Gift Annuity. Why make a gift to UNH in exchange for an attractive lifetime annuity? **IT MAY GIVE YOU MORE INCOME FOR LIFE.**

A portion of the gift will entitle the donor to an immediate income tax deduction, and a portion of the annuity income will be tax free over a substantial number of years. The benefits of a gift annuity depend on the age of the donor at the time of the gift. Annuity rates range from 6.5% (age 65) to 11% (age 90+). A

1994 donation to the University of New Haven of \$50,000 by an eighty (80)-year-old donor would result in annual payments of \$4,400 (8.8% of \$50,000) for life, of which \$2,481 will be tax exempt until the donor reaches the age of 89. The donor would be entitled to a \$27,600 income tax deduction in 1994.

EVERYONE WINS WITH A GIFT TO UNH! You, the donor, increase your income, reduce your taxes, and make a gift to your alma mater. The university gets a gift to help fulfill its mission of providing quality education at an affordable price. For more information, call Bill DeMayo, Planned Giving Officer, at (203) 932-7130.

The UNH Alumni Office is working in conjunction with Vantage Travel Service to sponsor a spectacular 10-day cruise tour of Alaska departing on June 3, 1995. The trip includes free round-trip airfare from most major U.S. cities, two free nights in Vancouver, B.C., and a seven-day cruise aboard the Cunard Crown Dynasty. The price is \$1,440 per person, which includes most meals. For further sightseeing information call Terry Monac at (800) 634-2180.

EMBA alumni held a networking reception this summer at the UNH main campus for all graduates of the New Haven classes. Shown above are, left to right, instructor Joel Mellis and Judith Madeux '92 (back to camera) in conversation with the chairman of the event, Jonathan Joslow '92. Similar EMBA receptions at the Landmark Club in Stamford, chaired by EMBA student Thomas Palombo, and at the Southeastern Connecticut branch in Groton, chaired by Janet Perks '92, are being held in October. The focus of the receptions is to revitalize the social and business relationships established in the program. Additional EMBA alumni events are planned for next spring. Call the Alumni Office (203) 932-7270 for additional information.

Reunion Sixties Huge success

More than 125 alumni and guests "came home again" when they attended Reunion Sixties over the weekend of September 16-18.

While the Friday night "Sixties Mixer" and the Saturday afternoon football game in which the Chargers dramatically beat Indiana University of Pennsylvania drew the biggest attendance, many alumni from the 1960s were heard to reminisce about their college days after taking a trip "Down Memory Lane" with former UNC and UNH president Marvin K. Peterson and professors/staff from the sixties on Saturday morning.

Highlights from Reunion Sixties are captured by the photographs on this page.

Fred Vigorito '66 and his Galvanized Jazz Band entertained alumni and UNH fans attending the football game.

Dick Jackson '65 joins New Haven College Cheerleader Rosemary (DeLizio) Shaeffer '67 in leading the Chargers to an 18-16 victory over Indiana University of Pennsylvania.

Returning alumni examine yearbooks, photographs and other memorabilia from their years at New Haven College.

Members of this year's Chi Kappa Rho who registered the alumni join the founders of the sorority, Ellen (Kasinkas) Turschmann '70 (second from left), Rosemary (DeLizio) Schaeffer '67 (third from left), and Palma (Cappiello) Pagoda '69 (second from right).

If an alum gets out of STARLAB, he ought to get the award for traveling the furthest to attend Reunion. That's what Frank Mauro '66 thought as he was greeted by Patti (Liberatore) Avallone '69. As it turned out Mauro came only from Virginia while other alumni traveled from as far away as Florida. The STARLAB inflatable planetarium was part of a display for UNH-West Haven Community Day, an annual town-gown affair that was held on Saturday during the reunion.

Class Notes

1968

Larry Hansen was recently honored by the American Society of Safety Engineers for editorial excellence. He received first-place honors for his article "Safety Management: A Call for (R)evolution" which appeared in the March 1993 issue of *Professional Safety*.

1973

Paul Barrows of Anaheim, CA, teaches mathematics at Magnolia High School. He is also a real estate investor and owns his own "900" number business.

1970

Richard H. Gesseck, CPA has recently been elected secretary for the Connecticut Society of Certified Public Accountants. Richard is a partner in the Hartford office of Ernst & Young and resides in Cheshire.

1972

John C. Hare was recently appointed vice president of industrial and governmental affairs for the Transportation Division of Siemens in Washington, DC. He resides with his wife Kathleen and their four sons in Doylestown, PA.

Bruce D. Sexton of Sprague, has joined Coldwell Banker Leighton Realty. He has been in the residential real estate brokerage business for two years and will work out of the Norwich regional office.

1974

Jeffrey S. Ellis has been named President/CEO of Tri-Gas, Inc. an Irving, TX, manufacturer and distributor of industrial and medical gases.

Commander Alan M. Haefner was recently appointed executive officer on the aircraft carrier U.S.S. Constellation stationed in San Diego, CA.

John R. Savory has started his own residential appraisal business, JRS Appraisals, in Monterey, CA. He previously completed a 24-year career as a submarine naval officer in 1981.

1975

P. Dennis Meligonis has been appointed utilities director of Little Creek Amphibious Base, Norfolk, VA. He resides in Virginia Beach with his wife Norma and two children.

Dennis J. Criscuolo has been promoted to vice president - information systems at ATS Telephone & Data Systems in Memphis, TN. He resides with his wife and two children in Germantown, TN.

Peter F. Govoni of Glastonbury has been appointed senior vice president of systems and operations at Springfield (MA) Institute for Savings.

Edward J. Regan III has been elected to the board of directors of Wilbur Smith Associates, Inc., Columbia, SC. He has been with the firm since 1975.

1980

Michael Jorgensen was recently appointed executive assistant manager of Four Seasons Hotel Houston. He has been with Four Seasons Hotels and Resorts since 1989.

Thomas Morrone, CPA has started his own accounting and tax practice located in North Haven, where he also resides.

1981

Patricia Kling-Loucks has accepted a staff position with New York State Assemblyman Paul D. Tonko of the 105th assembly district. Assemblyman Tonko is the chairman of the assembly's standing committee on energy. Pati clerked for the energy committee during the 1994 legislative session. She

lives with her husband Jim and son Jesse in Amsterdam, NY.

James Krupp has been elected vice president - materials at Echlin, Inc. where he has been employed since 1989. He resides in Wallingford with his wife and two children.

1982

Andrew J. Acampora has been named manager of the customer service human resource team at corporate headquarters of Ostram Sylvania, Inc. in Danvers, MA. He also received his Ph.D. in May 1994.

Ronald S. Gambardella, EA of Hamden was elected to the board of directors for the Connecticut Society of Enrolled Agents (CTSEA) for a two-year term.

Catherine M. Randolph has moved to Ecuador for a three-year tour with the U.S. Embassy.

1983

Joanne Schaefer Stein has recently been chosen president-elect of the Connecticut College and University Counselors Associations. She is director of counseling at Teikyo Post University and lives in Cheshire with her husband and four children.

1984

Maryanne Garry has recently won the 1994 Harris Kahn Memorial Dissertation Award for her Ph.D. dissertation on memory distortion. The award honors one student each year for completing a doctoral dissertation of special distinction. She is assistant professor in residence in the psychology department at the University of Washington in Seattle.

Edward H. Goldman was recently promoted to the position of quality assurance manager at Seitz Corp. He joined the company in 1989

as a special accounts manager for major accounts in the U.S. and Europe.

Paul Smotas of Southington has taken a position as administrator assistant to the superintendent in the Vernon school system. He previously had been with the Southington school system for 19 years and held the position of school business manager.

1985

Robert V. George, JD was the recipient of the American Jurisprudence Award from Southern Illinois University Law School. He was admitted to the Colorado Bar in May 1994 and has entered private law practice in Denver, CO.

Dale P. Hourigan, a Connecticut state trooper has been promoted to the rank of sergeant. He has been assigned to the Westbrook Barracks, Troop "F."

1988

Judy E. Groleau of Cambridge, MA, is a senior travel consultant for Thomas Cook Travel in Harvard Square, Cambridge. In April 1994 she was in the top ten for sales in New England for Thomas Cook Travel. Judy has been with the company for six years.

Michelle Zint, who has been a member of the West Haven Jaycees for nine years, is now president of the West Haven chapter.

1989

Daniel T. Darcy has been promoted to plant manager, H.B. Reese Candy Co., Hershey, PA, plant of Hershey Chocolate U.S. He resides in Hershey with his wife Frances and two children.

Thomas C. Reynolds received his master of arts degree with a major in public policy from Trinity College in

May. Tom is on the Alumni Board at UNH and is a staff assistant in the president's office at Connecticut College.

David A. Osiecki has been named vice president, sales for Gerber Systems responsible for domestic and international sales and service. He joined Gerber 20 years ago.

Clotilde Dudley Smith has completed coursework for her doctorate in education management and is beginning her dissertation. She is a part-time assistant professor at UNH and has her B.S. in dental hygiene. She and her husband **Ronald**, '82, '89, who is a sergeant with the Hamden Police Department, reside in Orange with their daughter Chloe.

Timothy C. Wells, Sr., area manager at Bic's Milford headquarters, has been named chairman of the Major Firms Division of the Milford United Way. The division annually accounts for about 70 percent of United Way's campaign results. He has been with Bic Corp. since 1980.

1990

Frank Petrucci prepared a general clinical research center grant with Gordon H. Williams, M.D., at Brigham and Women's Hospital of Boston. The proposal received National Institutes of Health approval for \$21 million to continue studying patients with endocrine, hypertension, circadian, and other medical disorders.

Scott W. Senete has been elected to the position of vice president, commercial services, at Union Savings Bank in Danbury. He is also currently involved in the 1995 Special Olympics World Games. He and his family reside in Brookfield.

1991

Joseph S. Iaco has been elected Republican town chairman in Seymour.

Gerald J. Lukowski of Amston was promoted to the rank of captain in conjunction with assuming command of Bravo Company, 242 Engineer Battalion, Connecticut Army National Guard in Rockville.

1992

Lisa M. Edwards Fitzgerald of Seymour has been with the New Haven Police Department since 1992. She was promoted to detective in August 1993 and was recently transferred from the Narcotics Enforcement Unit to the Bureau of Identification.

1993

Alton S. Gibson, Jr. of Elmont, NY, has retired from the U.S. Postal Service and is now vice president, corporate management, Urban Resource Institute in Brooklyn, NY.

Stephanie Jurta of Andover, NH, was selected from more than 60 applicants as a full-time patrol officer. She previously served as a special police officer for the Franklin, NH, department.

1994

Navy Captain James R. Harvey recently assumed command of the Submarine Squadron 17, Silverdale, WA. Among his personal awards and decorations are the Legion of Merit, Meritorious Service Medal, and the Navy Commendation Medal. He joined the Navy in April 1958.

Chargers in thriller against IUP

A record 4,147 fans packed Dodds Stadium to watch the Division II fifth-ranked Chargers football squad pull off a thrilling come-from-behind 18-16 victory over the second-ranked Indiana University of Pennsylvania on

showed its true grit, and with three minutes remaining drove from its own 47-yard line to the IUP nine-yard line in eight plays. With just under two minutes left to play, kicker Gene Adair split the up-rights with a 25-yard field goal,

putting the Chargers ahead to stay. When the dust had cleared, the statistics showed 1993 Harlon Hill Trophy winner Roger Graham had rushed for 131 yards — his third 100 plus yard game of the season.

The UNH team won its first two

games of the season in less dramatic fashion, beating Bloomsburg 38-6 and Kutztown 31-6. Graham has 512 yards and six touchdowns in his first three games, and quarterback Weir has thrown for more than 600 yards and three touchdowns. The defense has been stingy, allowing opponents an average of only 201 yards — and just 36.3 rushing yards per game.

As *Insight* was going to press, the Chargers regular season winning streak came to an end with a 27-16 loss to the Abilene Christian Wildcats in Texas. The bright spot of the game was Roger Graham rushing for 134 yards, the 25th consecutive time he went over 100 yards and breaking the NCAA Division II record set over the 1971-73 seasons.

Volleyball team off to great start

The Chargers are off to another outstanding volleyball season, opening the year with two tournament titles and a perfect 11-0 record.

They opened the season with a three-game sweep of Rhode Island College, allowing the opponents just three points in the three games. The Blue and Gold followed that with three-game sweeps of C.W. Post, Millersville, Southampton, and Springfield College to capture the annual UNH-Baden Invitational.

The three-game sweeps continued over the next five matches as the team improved to 10-0 and won the UNH Invitational title with a victory over Pace University.

The outstanding players so far in this season include: setter Shala Asalita, who has a .333 hitting percentage in addition to her team-leading 22 service aces; Jane Grant, the 1994 Female Athlete of the Year, who leads the team with 79 kills and has a hitting percentage of .325; and Shirley Hoyte, who leads the team with a .421 hitting percentage and 90 digs.

While the team consists of all returning players, the head coach is new. Robin Salters, who played volleyball for the Chargers during the 1990 and 1991 seasons, replaces Debbie Chin, who started the program in 1977 and finished her career with 570 wins. Chin is now UNH athletic director.

Quarterback Jim Weir (17) pitches to Harlon Hill Trophy winner Roger Graham (34), who rushed for 131 yards against Indiana University of Pennsylvania.

September 17. The win moved the 3-0 Blue and Gold up a notch to number four in the national rankings, and the top spot in the Northeast Region, which determines home field advantage in playoff games.

The Chargers were in firm control during the first half, taking a 15-0 lead to the locker room. The team had scored on a one-yard touchdown pass from quarterback Jim Weir to receiver Joe Davis, a two-yard touchdown dive by Roger Graham, and a safety by linebacker Darius Clay, sacking IUP quarterback Ken Ferguson in his own end-zone.

But the Indians came roaring back in the second half, and took a 16-15 lead with 13 minutes left in the game. Then the Blue and Gold

Hall of Fame

The Athletic Hall of Fame dinner will be held March 31 at the Woodwinds, Branford. The process for selecting nominees for the 1995 induction class is now underway. Hall of Famers who would like to make a nomination should call the athletic department at (203) 932-7016/7017 for a nomination form or to make reservations for the dinner.

Soccer

Women: a winning start for their second year

The Charger women's soccer team is off to a flying start in only its second year of existence with a 5-3 record. The five wins—against Sacred Heart, Bridgeport, Bryant, Bentley, and St. Rose—is almost as many wins as the team amassed in its entire first year when it compiled a 6-8 record.

Last year's top four scorers—Angie Murray, Mirielle DeRose, Tara Meagher and Melissa Jolly—have returned to the team for the 1994 campaign. All four have contributed to the team's quick start. DeRose has scored 13 points so far and is responsible for five of the team's 11 goals.

Newcomer Shannon Tosney ranks second in scoring with two goals, the same total for Meagher. Tosney came to New Haven over the summer, transferring from American International College where she earned All-New England Region honors. Jolly and Murray each have two points to date.

Goalkeeper Beth Bailey, another freshman, earned the starting job during pre-season camp. The rookie registered three shutouts in her first four games and allowed just one goal over the same stretch.

Men: only 10 veterans returning

The Charger men's soccer program is off to a slow start with a 1-5 record in the early going—the single win coming in a 5-1 victory over Quinnipiac.

First-year head coach Tom Poitras' team is sporting a new look this year as the season started with 15 newcomers and only 10 returning veterans.

Among the veterans is sophomore Tony Cartiera, a second team All-NECC forward in 1993, who tallied 35 points in his rookie campaign. The forward scored 16 goals and dished off three assists to register the most points in a season since Joshua Phillips' 47-point performance in 1984.

Sophomore Chiek Dikhate anchors the midfield position, especially with an injury to returning three-year starter Steve MacKenzie. Jason Taylor, a member of the Jamaican National Team, and transfer student Esteban Reyes, a two-time All-New England selection from Mitchell College, join Dikhate in the midfield.

Among those returning on defense are sophomores Keith Morgan and Bill Allison. Coach Poitras is looking to newcomers Oneil Mitchell, Chris Bloechle and Cesar Luaices to provide defensive assistance.

The Blue and Gold are also fortunate to have several quality goalkeepers on the roster, including three-year starter Lou Raba.

Winners of the athletic department's annual golf tournament were lead by alum Ned Bowman, right, BS'81. Others on the team are, from left, Mike Votto, Nick Carparelli, Jr., and Nick Carparelli.

Golf Tournament Review

More than 120 golfers took part in the athletic department's annual golf tournament in June at the Torrington Country Club.

The match was won by the team headed by alum Ned Bowman, BS'81, which also included Mike Votto, Nick Carparelli, and Nick Carparelli, Jr.

The tournament is the primary fund-raising event of the athletic department. Proceeds from this year's tournament will be used to improve the fitness center in Charger Gymnasium, and to purchase fitness equipment such as weights, bikes, and a stairmaster.

Several other contests took place within the tournament, including longest drive, closest to the pin, closest to the line. A par-three hole was designated as the "car" hole because any player getting a hole-in-one would win a new automobile.

Following the tournament a banquet and raffle were held, with the top prize a week's stay at a condominium in Pinehurst, NC.

Next year's tournament will be held on June 19 at Torrington Country Club. Any person interested in participating should call the Department of Athletics, (203) 932-7016/7017.

issue of Insight.*

Steven T. Klemenz, '78, right, president of the UNH Alumni Association, chats with several incoming freshmen at the alumni cookout during orientation on August 28. New and incoming students this year totaled 582. When added to the 1,031 returning students, the total day undergraduate population was 1,613—up approximately three percent from last year. The incoming students represent 22 states and 20 foreign countries.
